DETAILED ACTION

Allowable Subject Matter

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or teach a pulse drive motor with a rotary pulse generating device having a knob wherein the pulses are generated at a frequency corresponding to the turning speed of the knob and wherein the number of pulses corresponds to the turning angle of the knob in combination with the other features of claim 1.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Baer 5,210,636 discloses a uniaxial drive unit. Goldstein 4,379,245 discloses a manually operable pulse generating apparatus. McNutt 6,865,425 B2 teaches varying the output of a pulse device, including varying the frequency. No motivation has been found for combining these references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Judson H. Jones whose telephone number is 571-272-2025. The examiner can normally be reached on 8-4:30 M-F.

Art Unit: 2834
